Twice The Beauty - Twice The Savings!

Versus Conventional Decking:

	Beauty	Durability	Maintenance	Price*	Installation	Wastage	Ecology
Ipe Decking	+	HIGH	Medium	\$ 27 SF	Needs Installer	HIGH	-
Cedar Decking	+	Medium	Medium	\$ 19 SF	Needs Installer	HIGH	-
Redwood Decking	+	Medium	Medium	\$ 17 SF	Needs Installer	HIGH	-
Composites	-	HIGH	Low	\$ 24 SF	Needs Installer	LOW	+
Pressure Treated	-	HIGH	Low	\$ 17 SF	Needs Installer	LOW	+
Eco Decking Tiles	++	HIGH	Low	\$ 12 SF	DIY	NONE	+++

Wood Vs. Composites

Wood has character than no composite can offer. Unfortunately, it also requires substantial maintenance. Higher grade heartwoods are more durable and correspondingly more expensive than soft woods.

Advantages Of Wood:

Beautiful
If maintained, they age gracefully.
Lower cost than other materials.
May be refinished as needed.
Easy to paint or stain.

Disadvantages Of Wood:

Requires annual maintenance and sealing every year or so.
Softer woods deteriorate relatively quickly.
May split, crack, splinter or warp
Depending on wood, may not be pest resistant.
May use old growth wood or not be sustainably harvested

Advantages Of Composites:

Durable
Low maintainance
Some are paintable or stainable
Doesn't splinter, split, or warp
Moisture, pest, and rot resistant

Disdvantages Of Composites:

More expensive than wood.
Less strong than wood so requires closer joist spacing.
Often specifies pressure-treated wood for structural support..
Can't be refinished.
Environmental claims may be just so much "greenwashing"

The Bottom Line With Eco Decking Tiles:

Beauty! (Click Here)

It's Real Wood

Price: Lower Than Conventional Decking

Price: Lower Than Composites.

Price: \$ 11.99 DIY Vs. \$ 17 To 27 Per Square Foot (Installed).

No Permits Required For Installation

No Re Finish At All

Our Species (Wood) Are Splinter Proof, Pest Resitant.

Low Maintenance

Proven Durability

Stronger Than Cedar, Redwood & Even Composites

Sustainable Lumber!

The Bottom Line - Eco Decking Tiles Vs Similar Products:

“Similar Products”

[Click On The Picture To Enlarge](#)

This picture comes from a very unhappy customer that purchased “decking tiles” made in China. We don't assume that all deck tiles made elsewhere warp, bend, and simply do not last after a few months, but this is a sample of a product that is sold “cheap”, and does not provide the quality that decking tiles should have.

Cheap, in the long run, means expensive as this particular customer obviously paid for a product that doesn't last, and struggled to get a refund.

Would you risk your money?

Our product has a 10 year manufacturer's warranty. After 7 years on the market (we originally had a 5 year warranty) and a very low level of returns, we are confident that our product is what Decking Tiles should be. Our warranty is crystal clear, if you should find a defective tile, or in time it warps, bends, or you are simply not satisfied, we will replace it, and refund you without any hidden charges.
